

AL TOUKHI SAFETY POLICY STATEMENT

Al Toukhi is firmly committed to operating its facilities and projects in a safe, efficient manner and in compliance with all applicable health, safety and environmental regulations. Our goal is to provide an injury free work environment where the facility and project is free of recognized hazards; people, equipment and the environment are not placed at unreasonable risk of injury or damage.

The most valuable resource we have is our people. Therefore, safety must be planned into all of our activities. Quality and productivity are critical to our operations but will never take precedence over the safety of personnel or protection of the environment.

The Health, Safety & Environmental Program has been developed to guide us in our daily activities and to give each employee the authority to stop any potentially unsafe work practices and recognize that employees are responsible for their own safety, as well as their fellow employees'.

Our ultimate target is to achieve ZERO health, safety and environmental incidents and promote performance that minimizes health and safety risks to our clients, our employees, the public and the environment.

Accordingly, it requires a unified team effort from all levels of the organization. Your cooperation and active participation in the Al Toukhi safety process is expected and appreciated, anything less is unacceptable.

Patxi Saez

President & CEO
